

## Wenker GmbH & Co. KG receives the CrefoZert Solvency Certificate from Creditreform for the third year running

This award certifies that Wenker GmbH & Co. KG is among the mere 1.7% of German companies with outstanding creditworthiness.

Risk aversion remains high among suppliers and investors and has continued unabated to generate a tightening of risk management criteria. All of this underscores the increased importance for small and medium-sized companies in particular of having their solvency verified by CrefoZert to cement public trust.

The terms for receiving the CrefoZert Solvency Certificate are:

- ♦ The Creditreform Solvency Index rating must be between 100 and 249.
- ♦ Balance sheet solvency must have a rating of CR7 or better.
- ♦ Analysis of the company's annual financial statement must have its basis in annual financial statements gathered together no later than 10 months since the preparation of the balance sheet.
- ♦ There is no indication of any significant creditworthiness risks revealed by our compact company questionnaire on the company's current situation and prospects for the future.

The certificate is valid for one year subject to compliance with the award criteria. The current status can be viewed at [www.creditreform.de/crefozert](http://www.creditreform.de/crefozert)

Ahaus, Dec. 2016
